

# Dashboard Requirements

## *Hello Data Analyst*

Your task today is to download the healthcare dataset from the link provided below and analyze the financial performance of the healthcare center. Additionally, provide insights on the healthcare providers.

### **Requirements:**

1. KPIs and Trends: Identify and present the key performance indicators (KPIs) and significant trends in the dataset.
2. Detailed Analysis: Ensure the analysis is thorough and detailed, covering all relevant aspects of the healthcare center's finance and the performance of healthcare providers.
3. Dashboard Creation: Create a comprehensive dashboard consisting of 3 to 4 pages that includes:
  - Financial Overview: Summarize the financial health of the healthcare center.
  - Provider Insights: Analyze the performance and efficiency of healthcare providers.

- Trend Analysis: Highlight any important trends over time.
- Additional Insights: Any other relevant insights that can be derived from the data.

### **Expectations:**

- Visualization: Use appropriate visualizations to effectively communicate the findings.
- Interactivity: Ensure the dashboard is interactive and user-friendly.
- Clarity: Present the data in a clear and concise manner, making it easy for stakeholders to understand the insights.

Thank you,
